Pay Per Cloud® selected to be the hosting platform for Jell Networks', LLC. Online Video Collaboration Solution

The demand for cloud based video conferencing is soaring as businesses continue to look for more cost effective ways to connect a distributed work force, interface with customers more effectively, and reduce travel costs.

Jell's enterprise video collaboration service, JellVideo™, provides SaaS based video collaboration solutions designed for the entire enterprise. The cloud-based infrastructure allows for an incredibly cost-effective and highly mobile solution platform.

Jell's innovative participant based pricing allows for cost-effective enterprise-wide deployment. A company with 1,000 employees can pay as little as \$153 per month for enterprise level video collaboration capabilities.

Jell selected Pay Per Cloud after comparing JellVideo's performance on other leading cloud platforms. "The infrastructure requirements for providing an enterprise level video conferencing solution that can be accessed from anywhere on the planet, are exacting. The combination of Pay Per Cloud's 10GB backbone, reliability, outstanding processing power, and world-class 24x7 support enables us to provide cost-effective video collaboration solutions to the most demanding clients. After our move to Pay Per Cloud's hosted infrastructure, we saw an immediate 20% improvement in performance." said Joseph Karwat, CEO Jell Networks, LLC. "Our customers now have a browser based video collaboration solution that's easy-to-use on both MACs and PCs, and enables a distributed team to work productively."

Tony Underwood, Pay Per Cloud's EVP Business Development, stated, "We are excited about Jell Networks Video Conferencing solution. It is another example of an innovative company providing better, lower cost solutions for its customers and using the cloud as an effective platform for delivering its product."

About Pay Per Cloud

Pay Per Cloud hosted-solution clients benefit from fail-proof hardware redundancy and disaster recovery, 99.999% uptime, the performance a 10GB network backbone and best-of-breed hardware along with automatic upgrades to the newest versions of software, all for a predictable monthly fee rather than repeated capital expenditures.

About Jell Networks

Jell offers a SaaS based service, called JellVideo, which makes video meetings more effective. Our advanced User Interface provides key functionality at the Enterprise, Chairperson, and Participant level. With a focus on addressing the needs of a mobile work force, JellVideo enables distributed teams to function effectively in today's work environment. JellVideo turns online video meetings into rewarding experience.
